Professional Profile

Senior Product Designer (UX/UI) with a focus on complex SaaS platforms and data-driven applications.

Specialized in structuring complex systems and transforming business logic into clear, scalable, and user-centered product solutions.

Combines Product Design with Product Thinking and Product Marketing to develop digital products that are not only functional but also clearly positioned and impactful.

Works end-to-end – from discovery and problem definition through UX design to implementation – in close collaboration with Product Management and Engineering.

Professional Experience

2025 – 2026: Product Designer (UX/UI) & Product Marketing Manager at Quatico

Hybrid role combining Product Design and Product Marketing for a SaaS CPQ platform with integrated AI-assisted features for the creation and structuring of services.

Product Design & UX Strategy:

- Concept and design of an AI-assisted CPQ platform for service configuration
- Simplification of complex systems into clear and user-centered solutions
- Structuring of user flows, information architecture, and configuration logic
- Application of the Design Thinking methodology throughout the entire product development process

Product Marketing & Growth:

- Concept and structuring of product pages and digital sales experiences
- Development of positioning and key messaging (value proposition and value communication)
- Execution of acquisition campaigns (Google Ads) and optimization of the conversion funnel

2022 – 2024: Product Designer / Senior UX/UI Designer at Digital Strom AG

Responsible for UX/UI design and the further development of digital products in the Smart Home and Energy Management sector.

Product Design & UX:

- Concept and design of web and mobile applications in the Smart Home environment
- Structuring complex data and systems into clear, user-centered user experiences
- Conducting user research, usability testing, and defining user journeys
- Development of information architecture, wireframes, and interactive prototypes

Product & Collaboration:

- Close collaboration with Product Management and development teams
- Contribution to the further development of design systems and product standards
- Support in the strategic development of digital products

2016 – 2021: UI/UX Engineer at Arpage AG

Concept and UX/UI design of digital healthcare solutions (e-Health, Electronic Medical Records) with a focus on user-centered applications and complex data structures.

Product Design & UX:

- Analysis, definition, and validation of user requirements
- Development of information architecture, user flows, and interaction concepts
- Design of prototypes and creation of design systems
- Conducting UX research, interviews, and usability testing

Projects & Impact (Selection):

- **Ärztelijke (CB8 Next):** Leading UX research and Design Thinking workshops to define the product strategy
- **Meineimpfungen.ch (Relaunch):** Development of personas, user journeys, and prototypes for a successful relaunch
- **Pet Health Data:** Definition of requirements and design of effective UX/UI solutions
- **HIN / Spitex (PalliaCare):** Design of prototypes for Android and desktop applications in the e-Health sector

2014 – 2015: Interaction Designer at X-Technology Swiss AG

Participation in the UX/UI design of an e-commerce project, including information architecture, user flows, and prototypes for web applications.

1995 – 2002: Founder & Art Director Concept Interactif, Paris

Founded and managed a web agency (6 employees) focused on digital projects and campaigns. Selected clients: Lexmark, Eurodisney, Leclerc.

Education

2016 (8 Monate): Training at the Interaction Design Foundation with certifications in "Psychology of Interaction Design", "Web Design for Usability", and "User Research – Methods and Best Practices".

2011-2013: Further education in Cinema 4D as an additional skill in Motion Design.

2009-2012: German language courses, Migros Club School, C1 level.

1992-1995: European Institute of Management (EIM), Maxim's Business School, Paris.

1991: Baccalauréat B (High School Diploma, Economics and Social Sciences).

Skills

Tools: Figma, Adobe XD, Photoshop, Illustrator, After Effects, Cinema 4D

Development: HTML, CSS, JavaScript

AI-assisted design & development: Prompting, UI prototyping and implementation of component-based interfaces using LLM-based tools Studio Code.

Sprachen: French (native), German (fluent), English (fluent)

Interessen

Piano, Cinema, Illustration, Architecture, Tennis (formerly ranked 15/1), Gastronomy.
